Interactions

```
┌─────────────────────────────────────┐
│              express                │
├─────────────────────────────────────┤
│ Encapsulates each needed            │
│ operation in different              │
│ middleware or HTTP requests         │
└─────────────────────────────────────┘
```

Uses the router to
define what happens
for each request

```
┌─────────────────────────────────────┐
│        listings.server.routes       │
├─────────────────────────────────────┤
│ Encapulates the logic               │
│ for every route a user              │
│ might navigate to.                  │
└─────────────────────────────────────┘
```

Provides coordinates
for request listing

Handles the desired
CRUD operation

```
┌──────────────────────────────┐    ┌──────────────────────────────┐
│  coordinates.server.controller │    │  listings.server.controller  │
├──────────────────────────────┤    ├──────────────────────────────┤
│ This controller defines how to │    │ This controller defines      │
│ retrieve the coordinates for   │    │ all necessary CRUD           │
│ a given request                │    │ operations for               │
│                                │    │ managing the database        │
└──────────────────────────────┘    └──────────────────────────────┘
